#: Tutorial or laboratory as applicable. Choose one course from the MDM baskets. MDM: X is basket number, **Refer** <u>Annexure-I</u> for MDM details.

\*: Open elective (OE) offered by online platform such as SWAYAM/NPTEL, **Refer** <u>Annexure-II</u> for details.

**\$:** Student should choose any one course from Community Engagement project (CEP) /Field project (FP) /CCA prescribed in the syllabus at the start of semester.

X: Serial numbers of the courses under that particular category.

## Second Year B-Tech (S. Y. B-Tech.) Semester-3

Second Year B. Tech. (S. Y. B. Tech) AY (2025-26) **Information Technology (IT)** [3303101]: Data Structures and Applications (DSA) Credits **Teaching Scheme Examination Scheme** Semester **ISE: 20 Marks** 3 03 L: 03 Hrs./ Week **CIE: 20 Marks** ESE: 60 Marks Prerequisite: Students should have prior knowledge of • Fundamentals of Programming Languages- C, CPP, Basic Object-oriented concepts. **Course Objectives:** The objective of this course is to provide students with To introduce students to fundamental concepts of data, data objects, and structures, including their classifications, abstract data types, and practical applications of linked structures. • To familiarize students with the implementation and applications of stacks and queues and provide an understanding of algorithm design and analysis, focusing on efficiency and complexity. To enable students to comprehend, implement, and analyse a variety of sorting and searching algorithms, • including their time and space complexities. To provide students with an understanding of hashing techniques, collision resolution strategies, and file • organization methods for efficient data storage and retrieval. Course Outcomes: After completing this course, students will be able to CO1: Analyze and implement data structures such as arrays, linked lists, and generalized linked lists, and apply recursive techniques to solve complex problems. CO2: Design stacks and queues using static and dynamic data structures, evaluate their efficiency, and apply them to real-world scenarios like expression evaluation. CO3: Design various sorting and searching algorithms. Evaluate performances of searching sorting algorithms and determine the best approach for specific problem scenarios. CO4: Design efficient hashing techniques, resolve collisions effectively, and compare file organization methods for optimized data storage and access. **COURSE CONTENTS** 10 Hrs. **Module-I Introduction to Data structures** Data Structures Overview: Concept of data, Data object, Data structure, Concept of Primitive and nonprimitive, linear and Nonlinear, static and dynamic, persistent and ephemeral data structures. Abstract Data Types (ADTs), Arrays, multidimensional arrays, pointers, dynamic memory allocation. Iteration and Recursion: Recursive algorithms, solving problems with recursion. Linked structures: Linked lists singly and doubly, circular linked lists, introduction to generalized linked lists, Applications of linked lists (dynamic memory allocation, polynomial representation). Asymptotic notations: Big-O, Big-Theta, Big-Omega notations, Frequency count, Time and space complexity.

**Case Study:** Representing a polynomial using a linked list (LL) and performing operations - addition, subtraction, and multiplication on given 2 polynomials.

Module-II	Linear Data Structures	<b>10 Hrs.</b>
Stacks: ADT, Ope	erations (push, pop, peek), applications (expression conversion and evaluatio	n, recursion).
	perations (enqueue, dequeue), types (circular queue, priority queue), Q	ueue application
<b>U</b>	mentation of stacks and queues using arrays and linked lists.	
	ed priority queue, designing stack from queue ADTs.	
Module-III	Searching and Sorting Algorithms	10 Hrs.
e .	ential search, Binary search, Fibonacci search. Sorting algorithms: Conc	•
÷	Internal Sorting: Sorting by Insertion: Insertion sort, Sorting by Excha	0 0
	g by Selection: Selection sort, Tree selection, Sorting by Merging: Merge sort	rt (Internal/Externa
•••	<b>bution:</b> Radix sort (Internal/External)	
manner.	thms: Time complexity comparison for searching and sorting algorithms in it	erative and recursi
	sort, Pigeonhole sort, select an appropriate sorting and searching algorit	hm for books to
-	rary. Also apply appropriate searching algorithm for the books.	
Module-IV	Hashing and Files	09 Hrs.
	bles and scattered tables: Basic concepts, hash function, characteristics of	
0	ddress transformations techniques, synonyms or collisions, collision resolution	C
•	probing, rehashing, chaining with and without replacement.	I
	ile, File types and file organization (sequential, index sequential and Direct A	Access), Comparis
of different file or	ganizations.	
Case Study: Hash	ning techniques on student database.	
<b>Text Books:</b>

1.	Linked lists	(Singly/Doubly linked li	st) operations. Create list, add	d nodes, delete, search, reverse,

- traverse.2.ADT implementation: Create queues and stacks using LL.
- 3. Write a program to maintain a database with at least 5-6 attributes. use sorting techniques to sort data for different attributes. use searching techniques to permit search vis different attributes (example: search using roll number, name etc)
  Give Time and space complexity of all algorithms used.

		[implementation: Groupwise different techniques will be asked to implement]
	4.	1. Program to convert infix to prefix and postfix. evaluate postfix and prefix expressions.
		2. Implement a priority queue.
		3. Implement a double-ended queue.
	5.	Program for hashing on key-value pairs. Demonstrate collision handling using chaining and
		without chaining.
	6.	File operations on various examples of databases
	7.	Mini project based on real world applications using STL implementation.

## [3307201]: Essential Skills Development Lab (ESDL)

Î

Semes	ster	Credits	<b>Teaching Scheme</b>	Examination Scheme		
3	3         01         P: 02 Hrs. / Week         CIE (TW): 50 Marks ESE: NA					
Prerequisi	te: Stude	nts should have pric	or knowledge of			
		mming concepts (prefe				
	•	•	s course is to provide stud	ents with		
		<b>d to prepare the stud</b> ing strategies to solve a		amming-based challenges. (Application)		
• Analyze p	oatterns and	l algorithms to optimiz	e substring search, suffix array	ys, and computational problems. (Analysis		
• Design str	ructured pr	ograms using Java syn	tax, object-oriented principles.	, and data handling techniques. (Synthesis		
• Evaluate (Evaluation		for efficiency and accu	aracy using competitive progra	amming techniques and logical reasoning		
Course Ou	tcomes: A	After completing this	course, students will be able	to:		
(Applicati	on)			eed using logical and analytical thinking and efficient data handling. (Creation)		
<ul> <li>Implement</li> </ul>	nt competi	tive programming tech	nniques, such as substring sea	rch, suffix arrays, and sliding window, t		
-	-	ems. (Application)				
			l optimize solutions for tim	e and space complexity in competitiv		
		ios. (Evaluation)		e une space complexity in competitiv		
	_		COURSE CONTENTS			
Group A			Problem Solving and Re	0		
1.				cal Reasoning, Pattern Recognition		
2.		: - Coding Puzzles, Bra and Torch, Mislabelled	•	rpretation Puzzles, System Design Puzzles		
3.	Quiz: -	C, C++, HTML, CSS				
Group B			Java Programmin	g		
4.	Program	nming Language (JA	VA) Syntax and semantics:			
	Students operator	-	a problem statement to Demo	nstrate the use of variables, data types, and		
	Sample	statement: Write a pr	rogram that calculates the area	of a rectangle using length * breadth.		
5.		ring the Data:				
	Array, s	s are expected to solve trings, and Vector <b>statements:</b>	a problem statement to demor	nstrate the use of data structures like		
			ses arrays to store the marks of display student names with th	f 5 students and finds the average. eir roll numbers.		

6.	Classes and Methods:
	Students are expected to solve a problem statement to demonstrate the use of class, object, and
	methods.
	Sample statements:
	a. Write a class Student with attributes: name, rollNo, and marks. Include methods to input data and
	display the student's result. b.Implement a constructor overloading with a Book class that can be initialized with (a) title only, (b)
	title and author, and (c) title, author, and price.
7.	Computations and Program:
	Students are expected to solve a problem statement to demonstrate Computations and loops.
Group C	Competitive programming
8.	Substring search:
	Students are expected to solve a problem statement to demonstrate the Substring search / pattern
	matching. Sample statement:
	Alice loves solving puzzles and recently found an old parchment containing a secret message. However,
	the message is hidden within a much longer string of gibberish. She knows the hidden message is a
	substring, and she wants to find all the starting indices where it appears in the larger string. Help Alice
	locate every occurrence of a given substring (pattern) within a longer string (text)?
	Use efficient algorithms such as <b>Knuth-Morris-Pratt</b> ( <b>KMP</b> ) or <b>Rabin-Karp</b> for optimal performance.
9.	Suffix array construction:
	Students are expected to solve a problem statement to demonstrate Suffix array construction.
	<b>Sample statement:</b> Write a program that constructs the suffix array for the given string. A single string S of length $1 \le  S  \le 10^{5}$ , consisting of <b>lowercase English letters</b> .
10.	Solitengul 1 ≤  5  ≤ 10     S, consisting of lower case English letters.       Number Theory:
10.	Students are expected to solve a problem statement to demonstrate Number Theory like Coprime Count
	Quest, Euler Totient Function, prime factorization.
	Sample statement: find the count of numbers coprime with N in the range from 1 to N.
11.	Sliding window, two pointers:
	Students are expected to solve a problem statement to demonstrate Sliding window, two pointers. <b>Sample statement:</b> You are given an array of N integers and an integer K. Your task is to find the
	length of the longest contiguous subarray whose sum is less than or equal to K.

<b>R1.</b>	Nagaraj, A. Jeevan Vidya: Ek Parichaya. Jeevan Vidya Prakashan, Amarkantak, 1999.
<b>R2.</b>	Tripathi, A. N. Human Values. New Age International Publishers, New Delhi, 2004.
<b>R3.</b>	Krishnamurthy, J. The Story of My Experiments with Truth - by Mohandas Karamchand Gandhi on Education.
<b>R4.</b>	Dharampal. Rediscovering India. Hind Swaraj or Indian Home Rule – by Mohandas K. Gandhi.
R5.	Gandhi, M. K. Hind Swaraj or Indian Home Rule.
Websi	ites and Online Resources:
W1.	Universal Human Values
	Link: <u>Universal Human Values - YouTube</u>
	• The focus of Universal Human Values is to guide learners in discovering what they find truly
	valuable in all aspects of life-individual, family, society, and nature/existence-while
	strengthening their resolve to uphold and live by these values.
W2.	English eSIP Module 1 Universal Human Values I (UHV I) Session 1& 2
	• Link: <u>https://www.youtube.com/live/OgdNx0X9231?feature=shared</u>
	• This video module introduces Universal Human Values (UHV), explores life without clarity of
	basic aspirations, and highlights the importance of right understanding, relationships, and
	physical facilities.
Releva	ant MOOCs Course (Course name and Weblink)
1.	NPTEL Course: Visions of Happiness and Perfect Society, by Prof. A. K. Sharma, Humanities and
	Social Sciences, IIT Kanpur.
	Link: NPTEL :: Humanities and Social Sciences - Exploring Human Values: Visions of Happiness
	and Perfect Society.
Releva	ant Topics for Self-study:
Makin	g the Right Choices: Staying True to Your Values Despite Outside Pressure
How H	Kindness and Understanding Help Build Strong Relationships

## List of Tutorials:

Sr. No.	Problem Statement	Hrs.	CO
1.	Analyze inherent relationships and harmony through self-exploration and evaluate the shift toward universal human consciousness and a holistic world vision.	2	CO1, CO3
2.	Reflect on personal experiences to identify patterns in human consciousness, and assess the influence of natural acceptance on decision-making.	2	CO1
3.	Differentiate between the needs of the Self and the Body; evaluate the sources of imagination within the Self; relate mental well-being to physical health.	2	CO1
4.	Analyze the role of trust and respect in human interactions, and evaluate their impact on personal and societal relationships.	2	CO2
5.	Reflect on personal family experiences to identify value systems and evaluate their contribution to societal harmony.	2	CO2, CO3
6.	Document and discuss real-life examples of universal human values like trust, respect, and gratitude in human relationships.	2	CO2
7.	Analyze the interconnectedness of self, family, and society, and assess how personal well-being contributes to societal harmony.	2	CO2, CO3
8.	Investigate natural ecosystems for balance and self-regulation, and propose ways humans can align their behavior with ecological harmony.	2	CO3

• Organize clean-up drives, tree plantations, recycling campaigns, or energy conservation initiatives.

#### 4. Health and Wellness:

- Promote health through awareness programs on hygiene, nutrition, and exercise.
- 5. Skill Development:
- Teach basic computer or technical skills to students, staff, or the community.

#### C. Step-by-Step Execution Plan:

#### **1. Planning Phase:**

• Team Formation:

Form teams of 3-4 students with a balance of skills and interests.

• Project Selection:

Choose a project theme and define a clear objective that aligns with community needs.

- Proposal Submission:
  - Submit a one-page project proposal outlining:
  - Title of the project.
  - Objective and expected outcome.
  - Plan of execution (timeline and activities).
  - Required resources (if any).
  - Get approval from the designated faculty mentor.

#### 2. Execution Phase:

- Phase 1 Activities
  - Conduct initial outreach and engage with the community or target participants.
  - Implement planned activities with close teamwork and documentation.

#### Phase Activities

- Continue engagement and collect feedback from the participants.
- Begin summarizing the outcomes of the project.

#### • Best Practices:

- Maintain a positive attitude and open communication with the community.
- Respect cultural norms and values of the participants.
- Adapt your plan based on real-time needs or challenges.

#### 3. Reporting Phase:

#### • Documentation:

- Create a detailed report containing
- Title, objective, and scope of the project.
- Activities conducted and timeline.
- Outcomes and community feedback.
- Photos/videos of the activities (if permitted).
- Challenges faced and how they were addressed.

#### • Presentation:

- Each team will present their project to a panel of faculty members or peers, showcasing their efforts and outcomes.
- Duration of presentation: 5-7 minutes per team.

D.	Evaluation	Criteria:
----	------------	-----------

Projects will be evaluated based on:

- 1. **Relevance:** How well the project aligns with community needs.
- 2. **Impact:** The tangible and intangible benefits delivered to the community.
- 3. Innovation: Creativity in the approach or solution provided.
- 4. Teamwork: Collaboration and effective delegation within the group.
- 5. **Documentation & Presentation:** Clarity, depth, and overall delivery of the report and presentation.

#### E. Guidelines for Conduct:

- 1. Behavior: Students should display professionalism, punctuality, and respect.
- 2. Safety: Follow all safety protocols during on-campus or fieldwork activities.
- 3. **Feedback:** Collect feedback from participants to measure the success and identify areas for improvement.

#### F. Support and Supervision:

- 1. Faculty mentors will be assigned to each group to guide them throughout the project.
- 2. A resource or helpdesk will be available for logistical or technical support.

#### [0313202]: Field Project (FP)

Semester	Credits	<b>Teaching Scheme</b>	Examination Scheme
3	01	P: 02 Hrs./ Week	CIE (TW): 25 Marks

#### Prerequisite: Students should have prior knowledge of

- Basic understanding of core engineering concepts relevant to the chosen field of work.
- Knowledge of teamwork, communication, and project planning.
- Awareness of safety protocols and ethical considerations for fieldwork.

#### Course Objectives: The objective of this course is to provide students with

- Hands-on, real-world experience in applying engineering concepts through practical problem-solving and teamwork.
- The ability to analyze real-world field situations by identifying key challenges and requirements.
- The skills to apply engineering knowledge, tools, and techniques to develop effective solutions.
- The capability to critically evaluate their fieldwork outcomes in terms of impact, feasibility, and sustainability.

#### Course Outcomes: After completing this course, students will be able to

**CO1:** Assess field conditions and identify problems through observation and interaction with stakeholders.

**CO2: Develop** and **execute** a practical, field-based solution or prototype aligned with the identified needs.

CO3: Reflect on and evaluate the project outcomes in terms of their technical, social, and ethical impact.

### **COURSE GUIDELINES**

#### **A. Group Formation:**

- Form a group of 3-4 students that share a similar interest in each batch, Duration: 24 hours (divided into manageable sessions or shifts).
- The group should be cohesive, sharing and caring, contribute to the task assigned.
- The task carried out need to be maintained in LOG book by each group.
- **B.** Field Project Execution Guidelines
- 1. Team Formation and Topic Selection:
  - Students form groups of 3-4.
  - Select a project aligned with an engineering problem or theme, such as:
    - Environmental monitoring and solutions.
    - Designing small-scale engineering systems.
    - Infrastructure or community development.
    - Renewable energy solutions.

#### 2. Proposal Submission:

- Prepare a proposal that includes:
  - Project title and objectives.
  - Problem statement and proposed solution.
  - Field location and timeline.
  - Required resources.
- Obtain faculty mentor approval.

#### 3. Fieldwork:

- Conduct site visits, data collection, and stakeholder interactions.
- Design or develop the solution based on field observations.
- Ensure proper documentation of all activities.

4.	Reporting and Presentation:			
	• Prepare a detailed report with:			
	<ul> <li>Objectives, methodology, and field observations.</li> </ul>			
	<ul> <li>Design, implementation, and results.</li> </ul>			
	<ul> <li>Challenges faced and lessons learned.</li> </ul>			
	Present the report and findings to faculty and peers.			
Refere	ence Books:			
R1.	Walesh, S. G. <i>Engineering Your Future: The Professional Practice of Engineering</i> . Cengage Learning, 2012. Real-world applications of engineering principles, teamwork, and ethical practices.

#### [0313203]: Co-Curricular Activity (CCA)

[0515205]: Co-Curricular Activity (CCA)					
Semester	Credits	Teaching Scheme	Examination Scheme		
3	01	P: 02 Hrs./ Week	CIE (TW): 25 Marks		
Prerequisite: Students should have prior knowledge of					
• Basic understan	• Basic understanding of core engineering concepts relevant to the chosen field of work.				
Knowledge of teamwork, communication, and project planning.					
Awareness of safety protocols and ethical considerations for fieldwork.					
<b>Course Objective</b>	es: The objective of t	his course is to provide stud	lents with		
• An opportunity	to acquire skills and c	ompetencies beyond the core	curriculum.		
• A foundation fo	or holistic personality of	levelopment.			
• Preparation for	future academic, profe	essional, and personal growth	<u>.</u>		
<b>Course Outcome</b>	s: After completing t	this course, students will be	able to		
CO1: Demonstrate	the ability to lead and	participate in teams.			
-	-	such as leadership, organizati	on, confidence time management,		
and socializat	ion.				
-	confidence and decision	-			
CO4: Experience th	e importance of comm	nunity involvement.			
COURSE GUIDELINES					
	•		nic Year 2025-26 for the UG Co-		
curricular activities are included as credit courses in the curriculum. Accordingly, the number of credits is					
incorporated in curriculum structure.					
BACKGROUND					
SCTR's Pune Institute of Computer Technology believes in wholistic development of student catering to					
the requirements of engineering attributes (program outcomes) prescribed by Washington Accord and					
NBA through the implementation of Outcome Based Education. There is a limited scope of attaining all					
the program outcomes through classroom and laboratory teaching learning process. To expand the scope					
of learning to acquire all the attributes, PICT proposes to institutionalize and formalize the ongoing extra					
and co-curricular activities which are being carried out by students by awarding due credits and a certificate					
	-		rtificate. The purpose of Co and		
		quisition of skills and compete	encies in areas that are not directly		
part of the curriculun	n.				

#### SCOPE

Co-curricular activity (CCA) is an activity, performed by students, that falls outside the realm of the regular academics of college or university education. Such activities are generally social, philanthropic, and often involve others of the same age. However, as part of autonomy and NEP 2020 guidelines some of the credits are included in the curriculum as mandatory for CCA. CCA includes but are not limited to Community Service Organizations (NCC, NSS), Cultural / Ethnic Organizations, Engineering Academic Honor Societies, Engineering Clubs/ Organizations, Orientation Programs, Health Related Organizations, Professional Engineering Societies – Student Chapters, Research (Voluntary Basis), Sports, educational

activities that include, seminars, workshops, project competitions, hackathons, debate competitions, and mathematics, robotics, and engineering teams and contests.

A student can earn one/two credits per year.

The activity hours accumulated throughout the year shall be calculated by the Co-Curricular Activity Committee (CCAC) to fix the number of credits to be granted to students at the end of the year. (Note: 30 hours =1credit)

#### **MODE OF IMPLEMENTATION**

- 1. A committee called Co-Curricular Activity Committee (CCAC) consisting of Dean Student Affairs and all the functional in charges of various activities shall facilitate the activities.
- 2. Identification and inclusion of Co-Curricular Activities to be considered for Credit System.
- 3. Mapping each activity to the program outcomes, design the assessment methodology.
- 4. Define the scope, methodology, number of hours required of each activity
- 5. Announcement of activity calendar
- 6. Registration and enrollment of interested students.
- 7. Allocation of faculty mentors to interested students based on the activity and expertise/interest.
- 8. Carry out the activities, submission of weekly report in the form of logbook.
- 9. Submission of detailed report in prescribed format mentioning all the activities carried out along with certificates, mementoes, photographs etc.
- 10. End-semester assessment and certificate of appropriate credits with the grade Outstanding, Excellent, Very Good, Good, Satisfactory etc.
- 11. Award of consolidated certificate at the time of graduation.

#### LIST OF VARIOUS CO-CURRICULAR ACTIVITIES 18. IEEE (PISB) 1. ADDICTION- Annual Social Gathering 19. IEEE APS 2. Alumni Association 3. Art Circle 20. Impetus & Concepts (INC) 4. Astro Club 21. Model United Nations (MUN) 5. Automobile Club 22. National Service Scheme (NSS) 6. AWS Cloud Club 23. PICTOREAL 7. Career Guidance Cell 24. ROBOCON 8. Code Chef 25. Smart India Hackathon (SIH) 9. CSI 26. Social media Cell 10. Cyber Security Club 27. Sports 11. Debate Society DEBSOC 28. Startup and Innovation Cell 12. Defense Aspirant Club 29. Student Welfare & Discipline 30. TechFiesta (PICT International Hackathon) 13. Entrepreneurship Development Cell 14. Ethicraft Club 31. ACM (PASC) 15. Finance club (PFISOC) 32. TEDx PICT 16. FOSS Club 33. Training and Placement 17. Game Development Club (Game Utopia) 34. Universal Human Values (UHV)

#### **Prerequisite:** Students should have prior knowledge of

• Data Structures and Applications.

#### Course Objectives: The objective of this course is to provide students with

- To provide students with an understanding of Relational Database and No SQL Database.
- To enable students to execute SQL/PL SQL queries such as joins, set operations, and aggregate functions.
- To enable students to design and create no SQL database systems using MongoDB.
- To familiarize students with the design and implementation of database applications on their own.

#### Course Outcomes: After completing this course, students will be able to

**CO1:** Design and implement a database schema for given problems.

- CO2: Formulate queries using SQL DML/DDL/DCL commands for MYSQL Relation database.
- **CO3:** Formulate queries for No SQL Database.

CO4: Apply the normalization techniques for development of application software to realistic problems.

CO4: App	bly the normalization techniques for development of application software to realistic problems.		
	COURSE CONTENTS		
Assign. No.	Description of Assignment		
	Group A: Introduction to Databases (Study assignment)		
1	Study and design a database with suitable examples using following database systems:		
	Relational: SQL / PostgreSQL / MySQL		
	Key-value: Riak / Redis		
	Columnar: Hbase		
	Document: MongoDB / CouchDB		
	Graph: Neo4J		
2	Compare the different database systems based on points like efficiency, scalability,		
	characteristics and performance.		
	Group B: SQL and PL/SQL		
3	Design any database with at least 3 entities and relationships between them. Apply DCL and		
	DDL commands. Draw suitable ER/EER diagram for the system.		
4	Design and implement a database and apply at least 10 different DML queries for the		
	following task. For a given input string display only those records which match the given		
	pattern or a phrase in the search string. Make use of wild characters and LIKE operator for		
	the same. Make use of Boolean and arithmetic operators wherever necessary.		
5	Execute the aggregate functions like count, sum, avg etc. on the suitable database. Make use		
	of built in functions according to the need of the database chosen. Retrieve the data from the		
	database based on time and date functions like now (), date (), day (), time () etc. Use group		
	by and having clauses.		
	Implement nested sub queries. Perform a test for set membership (in, not in), set comparison		
	( <some,>=some, <all (unique,="" and="" cardinality="" etc.)="" not="" set="" th="" unique).<=""></all></some,>		
6	Write and execute suitable database triggers		

7			
	database. Demonstrate its use.		
	Group C: MongoDB		
8			
	Inserting and saving documents (batch insert, insert validation)		
	· Removing document		
	· Updating document (document replacement, using modifiers, upserts, updating multip		
	documents, returning updated documents)		
	Execute at least 10 queries on any suitable MongoDB database that demonstrates following		
	<pre>querying techniques:     find and findOne (specific values)</pre>		
	· Query criteria (Query conditionals, OR queries, \$not, Conditional semantics)		
	· Type-specific queries (Null, Regular expression, Querying arrays)		
	Implement Map reduce example with suitable example.		
	Group D: Mini Project / Database Application Development		
9			
-	(MYSQL)/No SQL Databases (MongoDB).

Market Dynamics.         Course Objectives: This course is intended to prepare the students with         • Developing awareness of Intellectual Property Rights (IPR) and associated ethical issues, including plagiarism, patent trolling, and safeguarding emerging technologies.         • Enhancing financial literacy for engineers by covering key concepts such as accounting, budgeting, capital budgeting, and the time value of money to support informed decision-making.         • Promoting professional excellence through the understanding of engineering practices, ethical decision-making frameworks, and the roles of professional bodies like IEEE and ASME, as per AICTE guidelines.         • Familiarizing students with emerging technologies and their impact on the IT industry, fostering innovation and problem-solving skills.         Course Outcomes: After completing this course, students will be able to         CO1: Identify and address ethical concerns in IPR while protecting technological innovations responsibly.         CO2: Make informed financial decisions using knowledge of budgeting, accounting, and investment evaluation techniques.         CO3: Apply ethical decision-making frameworks and actively engage with professional organizations like IEEE and ASME.         CO4: Analyze and apply emerging technologies to solve real-world IT challenges.         CO4: Analyze and apply emerging technologies in protecting AI modeline and rule servers.       08 Hrs.         Introduction to IPR: Definition and types of IPR: Patents, Copyrights, Trademarks, Trade Secrets, and Industrial Designs.       114112         Ethics in IPR: Ethical dilemmas	4	02		CIE (	ГW): 50 Marks

• Develop a simple prototype or solution that addresses a real-world problem (e.g., a watersaving device, simple mobile apps, or tools for community use).

#### 3. Environmental Sustainability:

• Organize clean-up drives, tree plantations, recycling campaigns, or energy conservation initiatives.

#### 4. Health and Wellness:

• Promote health through awareness programs on hygiene, nutrition, and exercise.

#### 5. Skill Development:

• Teach basic computer or technical skills to students, staff, or the community.

#### **Step-by-Step Execution Plan:**

#### 1. Planning Phase:

#### • Team Formation:

Form teams of 3-4 students with a balance of skills and interests.

#### • Project Selection:

Choose a project theme and define a clear objective that aligns with community needs.

#### • Proposal Submission:

- Submit a one-page project proposal outlining:
- Title of the project.
- Objective and expected outcome.
- Plan of execution (timeline and activities).
- Required resources (if any).
- Get approval from the designated faculty mentor.

#### 2. Execution Phase:

- Phase 1 Activities
  - Conduct initial outreach and engage with the community or target participants.
  - Implement planned activities with close teamwork and documentation.

#### Phase Activities

- Continue engagement and collect feedback from the participants.
- Begin summarizing the outcomes of the project.

#### • Best Practices:

- Maintain a positive attitude and open communication with the community.
- Respect cultural norms and values of the participants.
- Adapt your plan based on real-time needs or challenges.

#### 3. Reporting Phase:

#### • Documentation:

- Create a detailed report containing
- Title, objective, and scope of the project.
- Activities conducted and timeline.
- Outcomes and community feedback.
- Photos/videos of the activities (if permitted).
- Challenges faced and how they were addressed.

#### • Presentation:

- Each team will present their project to a panel of faculty members or peers, showcasing their efforts and outcomes.
- Duration of presentation: 5-7 minutes per team.

#### **Evaluation Criteria:**

Projects will be evaluated based on:

- 6. Relevance: How well the project aligns with community needs.
- 7. **Impact:** The tangible and intangible benefits delivered to the community.
- 8. Innovation: Creativity in the approach or solution provided.
- 9. Teamwork: Collaboration and effective delegation within the group.
- 10. **Documentation & Presentation:** Clarity, depth, and overall delivery of the report and presentation.

#### **Guidelines for Conduct:**

- 4. Behavior: Students should display professionalism, punctuality, and respect.
- 5. Safety: Follow all safety protocols during on-campus or fieldwork activities.
- 6. **Feedback:** Collect feedback from participants to measure the success and identify areas for improvement.

#### Support and Supervision:

- 3. Faculty mentors will be assigned to each group to guide them throughout the project.
- 4. A resource or helpdesk will be available for logistical or technical support.

#### [0413202]: Field Project (FP)

Semester	Credits	<b>Teaching Scheme</b>	<b>Examination Scheme</b>
4	01	P: 02 Hrs./ Week	CIE (TW): 25 Marks

#### Prerequisite: Students should have prior knowledge of

- Basic understanding of core engineering concepts relevant to the chosen field of work.
- Knowledge of teamwork, communication, and project planning.

• Awareness of safety protocols and ethical considerations for fieldwork.

#### **Course Objectives:** The objective of this course is to provide students with

- Hands-on, real-world experience in applying engineering concepts through practical problem-solving and teamwork.
- The ability to analyze real-world field situations by identifying key challenges and requirements.
- The skills to apply engineering knowledge, tools, and techniques to develop effective solutions.
- The capability to critically evaluate their fieldwork outcomes in terms of impact, feasibility, and sustainability.

#### Course Outcomes: After completing this course, students will be able to

CO1: Assess field conditions and identify problems through observation and interaction with stakeholders.

CO2: Develop and execute a practical, field-based solution or prototype aligned with the identified needs.

CO3: Reflect on and evaluate the project outcomes in terms of their technical, social, and ethical impact.

### **COURSE GUIDELINES**

#### A. Group Formation:

- Form a group of 3-4 students that share a similar interest in each batch, Duration: 24 hours (divided into manageable sessions or shifts).
- The group should be cohesive, sharing and caring, contribute to the task assigned.
- The task carried out need to be maintained in LOG book by each group.
- **B.** Field Project Execution Guidelines
- 1. Team Formation and Topic Selection:
  - Students form groups of 3-4.
    - Select a project aligned with an engineering problem or theme, such as:
      - Environmental monitoring and solutions.
        - Designing small-scale engineering systems.
        - Infrastructure or community development.
        - Renewable energy solutions.

#### 2. Proposal Submission:

- Prepare a proposal that includes:
  - Project title and objectives.
  - Problem statement and proposed solution.
  - Field location and timeline.
  - Required resources.
- Obtain faculty mentor approval.

#### 3. Fieldwork:

- Conduct site visits, data collection, and stakeholder interactions.
- Design or develop the solution based on field observations.

	Ensure proper documentation of all activities.
4.	Reporting and Presentation:
	• Prepare a detailed report with:
	<ul> <li>Objectives, methodology, and field observations.</li> </ul>
	<ul> <li>Design, implementation, and results.</li> </ul>
	<ul> <li>Challenges faced and lessons learned.</li> </ul>
DC	Present the report and findings to faculty and peers.

#### [0413203]: Co-Curricular Activity (CCA)

	[0413203]: CO	D-Curricular Activity (C	LCA)
Semester	Credits	Teaching Scheme	<b>Examination Scheme</b>
4	01	P: 02 Hrs./ Week	CIE (TW): 25 Marks
Prerequisite: Stu	dents should have pri	or knowledge of	
• Basic understan	ding of core engineering	ng concepts relevant to the cl	hosen field of work.
• Knowledge of t	eamwork, communicat	tion, and project planning.	
• Awareness of sa	afety protocols and eth	ical considerations for fieldw	vork.
<b>Course Objective</b>	es: The objective of th	his course is to provide stud	lents with
• An opportunity	to acquire skills and co	ompetencies beyond the core	curriculum.
• A foundation fo	or holistic personality d	levelopment.	
		essional, and personal growth	<u>.</u>
<b>Course Outcome</b>	s: After completing t	his course, students will be	able to
	the ability to lead and		
CO2: Develop severa	al important life skills s	such as leadership, organizati	on, confidence time management,
and socializat	ion.		
CO3: Improve self-	confidence and decisio	on-making abilities.	
CO4: Experience th	e importance of comm	unity involvement.	
	COU	RSE GUIDELINES	
As part of the impler	nentation of autonomy	with effective from Academ	nic Year 2025-26 for the UG Co-
curricular activities a	re included as credit co	ourses in the curriculum. Acc	ordingly, the number of credits is
incorporated in curric	culum structure.		
BACKGROUND			
SCTR's Pune Institut	te of Computer Techno	ology believes in wholistic de	evelopment of student catering to
the requirements of	engineering attributes	(program outcomes) prescri	ibed by Washington Accord and
NBA through the im	plementation of Outco	me Based Education. There	is a limited scope of attaining all
the program outcome	es through classroom a	and laboratory teaching learn	ing process. To expand the scope
of learning to acquire	e all the attributes, PIC	T proposes to institutionalize	e and formalize the ongoing extra
and co-curricular acti	vities which are being of	carried out by students by awa	arding due credits and a certificate
at the time of their g	graduation in addition	to the University degree ce	rtificate. The purpose of Co and
extracurricular activi	ties is primarily the acq	uisition of skills and compete	encies in areas that are not directly
part of the curriculun	n.		
SCOPE			

Co-curricular activity (CCA) is an activity, performed by students, that falls outside the realm of the regular academics of college or university education. Such activities are generally social, philanthropic, and often involve others of the same age. However, as part of autonomy and NEP 2020 guidelines some of the credits are included in the curriculum as mandatory for CCA. CCA includes but are not limited to Community Service Organizations (NCC, NSS), Cultural / Ethnic Organizations, Engineering Academic Honor Societies, Engineering Clubs/ Organizations, Orientation Programs, Health Related Organizations, Professional Engineering Societies – Student Chapters, Research (Voluntary Basis), Sports, educational

activities that include, seminars, workshops, project competitions, hackathons, debate competitions, and mathematics, robotics, and engineering teams and contests.

A student can earn one/two credits per year.

The activity hours accumulated throughout the year shall be calculated by the Co-Curricular Activity Committee (CCAC) to fix the number of credits to be granted to students at the end of the year. (Note: 30 hours =1credit)

#### MODE OF IMPLEMENTATION

- **1.** A committee called Co-Curricular Activity Committee (CCAC) consisting of Dean Student Affairs and all the functional in charges of various activities shall facilitate the activities.
- 2. Identification and inclusion of Co-Curricular Activities to be considered for Credit System.
- 3. Mapping each activity to the program outcomes, design the assessment methodology.
- 4. Define the scope, methodology, number of hours required of each activity
- 5. Announcement of activity calendar
- 6. Registration and enrollment of interested students.
- 7. Allocation of faculty mentors to interested students based on the activity and expertise/interest.
- 8. Carry out the activities, submission of weekly report in the form of logbook.
- **9.** Submission of detailed report in prescribed format mentioning all the activities carried out along with certificates, mementoes, photographs etc.
- **10.** End-semester assessment and certificate of appropriate credits with the grade Outstanding, Excellent, Very Good, Good, Satisfactory etc.
- 11. Award of consolidated certificate at the time of graduation.

#### LIST OF VARIOUS CO-CURRICULAR ACTIVITIES 1. ADDICTION- Annual Social Gathering 18. IEEE (PISB) 19. IEEE APS 2. Alumni Association 3. Art Circle 20. Impetus & Concepts (INC) 4. Astro Club 21. Model United Nations (MUN) 5. Automobile Club 22. National Service Scheme (NSS) 6. AWS Cloud Club 23. PICTOREAL 7. Career Guidance Cell 24. ROBOCON 8. Code Chef 25. Smart India Hackathon (SIH) 9. The structure for the multidisciplinary Minor courses is as follows.

Note: In course code X is a basket number. #: is laboratory or tutorial as per course requirements.

- 1. Students are expected to choose one of the eligible domains of MDM at the beginning of the Semester III.
- 2. Students will complete the chosen set of all multidisciplinary minor courses mentioned under the chosen MDM domain.
- 3. Students are not permitted to change from one domain to another.
- 4. Refer to the last column of the following table for eligibility to choose a particular MDM domain.

## **Annexure** -II

#### **Guidelines for Open Elective Courses**

- 1. Open Elective I will be offered in third semester as foreign language as prescribed in the structure.
- 2. Open Electives II, III, IV will be offered through SWAYAM/NPTEL MOOCs of Equivalent Credits.
- 3. Departments shall prepare the baskets of open elective courses from discipline/faculty other than respective major programs. Students may choose any course from the basket without adhering to any one stream.
- 4. Credits & Grade will be awarded based on the Marks Obtained through the certification including assignments and proctored examination as per the MOOCs Policy.

6	OE-IV	MOOCs	-	-	2	2	-	-	2	2	-	-	50	-	-	-	50

#### **Guidelines for MOOCs**

- 1. The department shall release a list of approved SWAYAM-NPTEL courses before the commencement of every semester.
- 2. Students shall register for the approved Courses as per the schedule announced by SWAYAM-NPTEL.
- 3. A student shall undergo the courses only from the list notified by the department through SWAYAM/NPTEL platform and complete all the assignments and examination requirements as specified by SWAYAM/NPTEL.
- 4. SWAYAM-NPTEL Courses are considered for transfer of credits only if the student concerned has successfully completed and obtained the SWAYAM-NPTEL Certificate.
- 5. The credit equivalence for SWAYAM-NPTEL Courses: 12 weeks 3credits; 8 weeks 2 credits; 4 weeks 1 credit.
- 6. Equivalent marks will be considered for awarding the grades as specified in examination rules and regulations. The weightage for assignments is 40%, while the weightage for the proctored examination will be 60% for award calculating SGPA/CGPA. Students must score a minimum of 40% of the total marks by combining both assignments and proctored examinations

- 7. A student must submit the original SWAYAM-NPTEL Course Certificates to the Head of the Department concerned, with a written request for the transfer of the equivalent credits. On verification of the SWAYAM-NPTEL Course Certificates and approval by the head of the department, credits will be awarded.
- 8. The Institute shall not reimburse any fees/expenses a student may incur for the SWAYAM-NPTEL Courses.
- 9. If the SWAYAM/NPTEL course calendar does not align with the institute's calendar, the department shall facilitate and conduct examination of the relevant course of equivalent credits in physical/virtual mode and award the credits accordingly.
